STICKY PDF CREATOR: A FUN, FREE TOOL THAT HELPS INTERNET MARKETERS AND ONLINE MERCHANTS BUILD THEIR BUSINESS

HOLLYWOOD, California (March 5, 2008) -- Sticky PDF Creator helps online entrepreneurs 'glue their brand to the Internet' and educate and inform customers and prospects.

"Sticky PDF Creator is free software that empowers online businesses and Internet Marketers to create PDF documents that showcase their offers," said Patrick Pretty, Internet Marketing's "Sensational Master Of Eye Candy."

"Use Sticky PDF Creator to create News Releases, branding materials, manuals, guides and instructions for customers, and to produce PDF-formatted eBooks and eReports," said Patrick Pretty. "PDFs help merchants 'glue their brand to the Internet' by providing digitized content that builds customer relationships and results in additional search-engine penetration."

Entrepreneurs who aren't using PDFs are missing out on customers who prefer to read digitized

documents online and save them to their computers for reference later. PDFs add value to virtually all online businesses and can be used to educate, enlighten and inform readers, thus leading to increased web traffic and business.

Sticky PDF Creator enables users to create documents that include graphics, headers, footers and clickable links. It is an excellent way to showcase offers and provide helpful content for readers.

"Sticky PDF Creator is a vital tool," said Patrick Pretty. "And because other PDF-creation programs may cost hundreds of dollars and bust the budgets of small businesses and upstart Internet Marketers, Sticky PDF levels the playing field, putting a critical piece of software in the hands of entrepreneurs free."

Sticky PDF Product Features

- Easy to use and fun!
- Instant download after registration.
- Create PDFs from inside StickyPDF's built-in Word Processor.
- Create PDFs from imported Microsoft Word documents.
- Import graphics.
- Insert headers/footers on command.
